🔗 Portfolio

BRIEF

AI/ML Engineer focused on building practical AI systems and data-driven solutions. Experienced in NLP, computer vision, and scalable ML pipelines using PyTorch. Skilled in model development, evaluation, and real-world applications, including RAG-based systems. Strong foundation in Python, SQL, and analytical problem solving.

PROJECTS (AI)

RAG-based AI Assistant

- Built and deployed full-stack RAG AI assistant (FastAPI, Next.js) with document-based QA
- Implemented PDF/DOCX ingestion, embeddings, and FAISS-based retrieval
- Designed retrieval-augmented pipeline to generate context-aware answers using LLMs
- Deployed application using Render and Vercel

Computer Vision Project – Transfer Learning

- Fine-tuned ResNet50 for multi-class image classification
- Applied data augmentation and regularization to improve generalization
- Implemented custom PyTorch training loop with GPU acceleration
- Optimized model performance through learning rate scheduling and optimizer tuning

End-to-End Machine Learning Classification System

- Built end-to-end ML pipeline including preprocessing, feature engineering, and evaluation
- Trained classification models (Logistic Regression, Random Forest, XGBoost)
- Applied cross-validation and hyperparameter tuning for model optimization
- Evaluated model performance using accuracy, F1-score, and ROC-AUC

WORK EXPERIENCE

Artificial Intelligence Engineer Intern, QSS Analytics

10/2025 – 01/2026

- Built and evaluated ML/DL models on real-world datasets.
- Performed feature engineering and preprocessing.
- Applied cross-validation and hyperparameter tuning.
- Assisted in deploying models via FastAPI APIs.

Baku, Azerbaijan

Front-End Developer, Baku Solution Community

07/2023 – 06/2025

- Developed data-driven web interfaces using React and Next.js
- Integrated backend REST APIs and built data-driven interfaces.

SKILLS

Programming & Data Analysis:

- Python
- SQL
- Pandas, NumPy
- Data Cleaning, Preprocessing & EDA

Machine Learning:

- scikit-learn
- Feature Engineering
- Model Evaluation & Metrics
- Cross-validation & Hyperparameter Tuning
- Ensemble Methods (Random Forest, XGBoost)

Deep Learning:

- PyTorch
- CNN
- Transfer Learning
- Regularization

Backend & Deployment:

- FastAPI
- Docker
- Model inference pipelines

NLP & LLM:

- Transformers
- Embeddings & Vector Search (FAISS)
- Text Preprocessing & Tokenization
- Retrieval-Augmented Generation (RAG)

Tools:

- Git, GitHub
- VS Code
- Jupyter Notebook

EDUCATION

Master's Degree – Information Systems in Management,

09/2025 – Present

Azerbaijan State Oil and Industry University

Baku, Azerbaijan

- SABAH Groups – National Excellence Program
- Specialization: AI-driven data systems and intelligent automation

Bachelor's Degree – Computer Engineering,

09/2021 – 06/2025

Azerbaijan State Oil and Industry University

Baku, Azerbaijan

- SABAH Groups – National Excellence Program
- GPA: 85 / Report Defense Score: 97

LANGUAGES

English

B2 – Professional Working Proficiency

Azerbaijani

Native

Turkish

C1

CERTIFICATES / COURSES

Generative AI Program, Holberton School

Azerbaijan – Full Scholarship supported by IDDA and PASHA Holding

02/2026 – 05/2026 | Baku, Azerbaijan

AI & Machine Learning Program, IDTech

Academy — Digital Youth Scholarship by the Ministry of Internal Affairs

10/2025 – 02/2026 | Baku, Azerbaijan
